Professional Summary

AI Engineer – AON

AI / Software Engineer with hands-on experience building production LLM-powered systems using AWS Bedrock and Azure-based data platforms. Strong in Python backend development, agent-based workflows, RAG architectures, and applied ML in regulated enterprise environments (insurance/fintech). Experienced in shipping GenAI features, collaborating cross-functionally, and improving system reliability through prompt engineering and evaluation.

Projects

Monday BI Agent | *Open-source GenAI Project*

GITHUB

- Built a Python-based agentic AI system that enables founders to query Monday.com sales data using natural language
- The system translates English questions into structured analytical workflows, performs deterministic calculations in Python, and uses LLMs for intent understanding, insight synthesis, and executive-ready responses.
- Designed with cost control, auditability, and graceful degradation for production-style GenAI usage.

GenAI Insurance Automation | *Azure + Agents + RAG*

SELF PROJECT

- Intelligent orchestration of LLM agents for extraction, validation, classification schema mapping.
- Hallucination reduction via retrieval ranking and grounded prompting.

AUTOMATED VENDING MACHINE | *OOPS,C++*

SELF PROJECT

- Simulation of a vending machine that dispenses various items in exchange of coins.
- Implemented an automated vending machine with a 97 percent product dispensing accuracy rate.

E-COMMERCE WEBSITE DATABASE | *MySQL,SQL*

SELF PROJECT

- Designed and implemented a comprehensive database system for an E-commerce website ,allowing efficient management of products, customer information, orders and transactions.
- Designed and implemented an e-commerce website database with a 96 percentage accuracy rate in order processing and inventory management..
- Implemented object-oriented programming practices such as inheritance to create different account types and databases.

Education

NATIONAL INSTITUTE OF TECHNOLOGY KARNATAKA

CGPA:6.97

B.Tech in Electronics and communication

2024

FIITJEE JUNIOR COLLEGE

SCORE:954/1000

CLASS 12th,Telangana State Board Of Intermediate

2020

SRI CHAITANYA SCHOOL

PERCENTAGE :9.7

CLASS 10th,Telangana Board Of Secondary Education

2018

Experience

AI Engineer

Sep 2024-current

AON CONSULTANCY

full-time

- Working on an AI-driven document processing system that converts unstructured insurance PDFs into a standardized target schema using LLMs.
- Designed and refined system-level and task-level prompts to improve structured extraction accuracy and schema alignment.
- Implemented components of the LLM workflow using models such as Claude and Gemini for extraction, classification, and data normalization.
- Worked across AWS and Azure environments -leveraging AWS (Bedrock) for model execution while maintaining code repositories and pipeline coordination with azure-based

- Contributed to translating high-level architecture into working modules, ensuring proper integration across processing layers
- Performed validation, testing, and output quality checks to ensure row-level accuracy and consistency before downstream usage.
- Worked with batch processing and multiprocessing mechanisms to support scalable document handling.
- Collaborated with cross-functional teams to understand requirements and ensure the final reports align with business expectations.

SENIOR BUSINESS ANALYST

June 2024-Sep 2024

AON CONSULTANCY

full-time

- Completed training covering Business Analysis, Project Management, Agile Methodologies and Scrum, Stakeholder management, Data Visualization and Requirement Elicitation.
- Collaborated with cross-functional teams to define business requirements
- Translated unstructured inputs into structured feature scope and technical documentation.
- Assisted in drafting PRDs, use cases, and process flows for AI-based internal projects.
- Engaged in product scoping discussions, supporting MVP definition and backlog prioritization.
- Supported internal teams by documenting feature implementation and delivery coordination across sprints.

SUMMER RESEARCH INTERN

June 2023-August 2023

STOCK MARKET PREDICTION USING LSTM

NITK, IT Department

- Collaborating closely with a team of 3 under the guidance of Dr. Dinesh Naik, a distinguished faculty member from National Institute of Technology Karnataka.
- Application development for predicting stock market prices using python, Machine learning and Deep Neural Networks. Design and Implementation of LSTM model to implement forecasting of opening price and closing price of a particular stock.
- I gained valuable insights into Machine Learning and Deep Neural Networks.

Technical Skills

GenAI & LLM Systems: LLMs, Transformers, Agentic AI, RAG; Prompt Engineering, Evaluation Pipelines, Hallucination Mitigation, Confidence Scoring; LoRA / PEFT, Fine-tuning, OCR / NER

Agent & GenAI Frameworks: Multi-agent orchestration, LangChain

Backend & Data Engineering: Python (backend services, data pipelines), REST APIs, FastAPI, ETL workflows, SQL, MySQL

Cloud & MLOps: AWS Bedrock, Azure Data Factory, Azure Synapse, Azure Data Lake, Docker, Git, CI/CD

ML & Analytics Libraries: PyTorch, TensorFlow, Keras, NumPy, Pandas, Matplotlib

Developer Tools: VS Code, TensorBoard, GitHub, Jira, Confluence

Certification

- The Product Management for AI and Data Science Course
- Python for Data Science, AI & Development
- AI for Everyone
- Generative AI: Introduction and Applications
- Introduction to Large Language Models
- Generative AI: Prompt Engineering Basics
- Generative AI with Large Language Models
